Phospho-Thr292 MEK 1 Antibody

Affinity purified rabbit polyclonal antibody
Catalog # AN1016

Specification

Phospho-Thr292 MEK 1 Antibody - Product Information

Application	**WB**
Primary Accession	Q02750
Reactivity	**Human**
Predicted	**Bovine, Human, Mouse, Monkey, Rat**
Host	**Rabbit**
Clonality	**polyclonal**
Calculated MW	**45 KDa**

Phospho-Thr292 MEK 1 Antibody - Additional Information

Gene ID	**5604**
Gene Name	**MAP2K1**

Other Names
Dual specificity mitogen-activated protein kinase kinase 1, MAP kinase kinase 1, MAPKK 1, MKK1, ERK activator kinase 1, MAPK/ERK kinase 1, MEK 1, MAP2K1, MEK1, PRKMK1

Target/Specificity
Synthetic phospho-peptide corresponding to amino acid residues surrounding Thr292 conjugated to KLH.

Dilution
WB~~ 1:1000

Format
Prepared from rabbit serum by affinity purification via sequential chromatography on phospho- and dephosphopeptide affinity columns.

Antibody Specificity
Specific for the ~45k MEK 1 protein phosphorylated at Thr292 in Western blots.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
Phospho-Thr292 MEK 1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping
Blue Ice

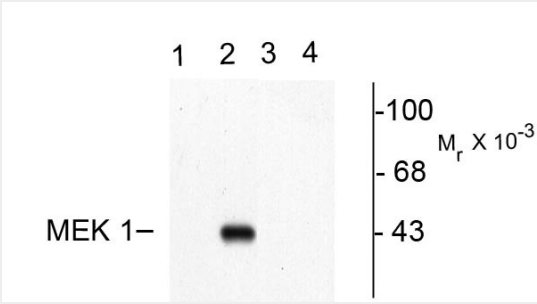
Phospho-Thr292 MEK 1 Antibody - Protocols

10320 Camino Santa Fe, Suite G
San Diego, CA 92121
Tel: 858.875.1900 Fax: 858.875.1999

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Phospho-Thr292 MEK 1 Antibody - Images



Western blot of recombinant wild type and mutant MEK 1 showing immunolabeling of the ~45k MEK-1 protein phosphorylated at Thr292. Lanes 1 and 2 are WT MEK 1 and Lanes 3 and 4 are mutant MEK 1 (T292A). MAP kinase was coexpressed in the samples run in Lanes 2 and 4.

Phospho-Thr292 MEK 1 Antibody - Background

MEK 1 (MAP kinase kinase, also known as MKK) is an integral component of the MAP kinase cascade that regulates cell growth and differentiation (Ahn, 1993; Chong et al., 2003). This pathway also plays a key role in synaptic plasticity in the brain (Adams and Sweatt, 2002). Activated MEK 1 acts as a dual specificity kinase phosphorylating both a threonine and a tyrosine residue on MAP kinase (Kyriakis et al., 1991; Seger et al., 1991; Crews et al., 1992). Conversely, there also appears to be a feedback phosphorylation of MEK 1 by MAP kinase. The sites on MEK 1 that are phosphorylated by MAP kinase are Thr292 and Thr386 (Mansour et al., 1994).
