

**Phospho-Ser523 5-Lipoxygenase Antibody**  
Affinity purified rabbit polyclonal antibody  
Catalog # AN1074

## Specification

---

### Phospho-Ser523 5-Lipoxygenase Antibody - Product Information

Application	WB
Primary Accession	<a href="#">P09917</a>
Reactivity	Human, Rat
Predicted	Monkey
Host	Rabbit
Clonality	polyclonal
Calculated MW	80 KDa

### Phospho-Ser523 5-Lipoxygenase Antibody - Additional Information

Gene ID	240
Gene Name	ALOX5
<b>Other Names</b>	Arachidonate 5-lipoxygenase, 5-LO, 5-lipoxygenase, ALOX5, LOG5

#### Target/Specificity

Synthetic phospho-peptide corresponding to amino acid residues surrounding Ser523 conjugated to KLH.

#### Dilution

WB~~ 1:1000

#### Format

Prepared from rabbit serum by affinity purification via sequential chromatography on phospho- and dephosphopeptide affinity columns.

#### Antibody Specificity

Specific for the ~80k 5-LO phosphorylated at Ser523 in Western blots

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

Phospho-Ser523 5-Lipoxygenase Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

#### Shipping

Blue Ice

### Phospho-Ser523 5-Lipoxygenase Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### Phospho-Ser523 5-Lipoxygenase Antibody - Background

The enzyme 5-lipoxygenase (5-LO) plays a key role in regulating the production of leukotrienes (LTs) (Funk, 2001). Overproduction of LTs contributes to several diseases, most notably chronic inflammatory diseases, including asthma (Drazen et al., 1994), fibrosis (Wilborn et al., 1996) and atherosclerosis (Dwyer et al., 2004). Recent work has demonstrated that the activity of 5-LO is regulated by PKA phosphorylation of serine-523 in 5-LO (Luo et al., 2004). Under normal conditions, this phosphorylation may be important in limiting inflammation. Abnormal signaling through cAMP and PKA, then, could contribute to a variety of diseases, including those characterized by chronic inflammation. The phospho-specific antibody to Ser523 on 5-LO is thus likely to provide a valuable tool for studies of the role of 5-LO regulation in diseases such as asthma, fibrosis and atherosclerosis
