

Anti-FTO (Fat mass and obesity related protein) Antibody

Our Anti-FTO (Fat mass and obesity related protein) primary antibody from PhosphoSolutions is mouse
Catalog # AN1389

Specification**Anti-FTO (Fat mass and obesity related protein) Antibody - Product Information**

Application	WB
Primary Accession	O9C0B1
Reactivity	Bovine
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a
Calculated MW	58282

Anti-FTO (Fat mass and obesity related protein) Antibody - Additional Information

Gene ID **79068**

Other Names

AlkB homolog 9 antibody, ALKBH9 antibody, Alpha-ketoglutarate-dependent dioxygenase FTO antibody, AW743446 antibody, Fat mass and obesity-associated protein antibody, FATSO, MOUSE, HOMOLOG OF antibody, Fto antibody, FTO_HUMAN antibody, GDFD antibody, KIAA1752 antibody, mKIAA1752 antibody, Protein fatso antibody

Target/Specificity

The FTO gene is the most robust gene for common obesity characterized to date. FTO gene expression has been found to be significantly upregulated in the hypothalamus of rats after food deprivation and strongly negatively correlated with the expression of orexin peptide which is involved in the stimulation of food intake (Fredricksson R et al., 2008). Deletion analysis of FTO gene in mice showed that FTO is functionally involved in the control of both energy intake and energy expenditure (Fischer J et al., 2009).

Format

Protein G Purified

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Anti-FTO (Fat mass and obesity related protein) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping

Blue Ice

Anti-FTO (Fat mass and obesity related protein) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Anti-FTO (Fat mass and obesity related protein) Antibody - Images

Western blot of rat testes lysate showing specific immunolabeling of the ~58 kDa Fto protein.

Anti-FTO (Fat mass and obesity related protein) Antibody - Background

The FTO gene is the most robust gene for common obesity characterized to date. FTO gene expression has been found to be significantly upregulated in the hypothalamus of rats after food deprivation and strongly negatively correlated with the expression of orexin peptide which is involved in the stimulation of food intake (Fredricksson R et al., 2008). Deletion analysis of FTO gene in mice showed that FTO is functionally involved in the control of both energy intake and energy expenditure (Fischer J et al., 2009).
