

MAP4K4 Antibody
Purified Mouse Monoclonal Antibody
Catalog # AO1191a

Specification

MAP4K4 Antibody - Product Information

Application	WB, IHC
Primary Accession	O95819
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1

Description

MAP4K4: mitogen-activated protein kinase kinase kinase kinase 4. The protein encoded by this gene is a member of the serine/threonine protein kinase family. This kinase has been shown to specifically activate MAPK8/JNK. The activation of MAPK8 by this kinase is found to be inhibited by the dominant-negative mutants of MAP3K7/TAK1, MAP2K4/MKK4, and MAP2K7/MKK7, which suggests that this kinase may function through the MAP3K7-MAP2K4-MAP2K7 kinase cascade, and mediate the TNF-alpha signaling pathway. Alternatively spliced transcript variants encoding different isoforms have been identified.

Immunogen

Purified recombinant fragment of MAP4K4 (aa400-500) expressed in E. Coli.

Formulation

Ascitic fluid containing 0.03% sodium azide.

MAP4K4 Antibody - Additional Information

Gene ID 9448

Other Names

Mitogen-activated protein kinase kinase kinase kinase 4, 2.7.11.1, HPK/GCK-like kinase HGK, MAPK/ERK kinase kinase kinase 4, MEK kinase kinase 4, MEKKK 4, Nck-interacting kinase, MAP4K4, HGK, KIAA0687, NIK

Dilution

WB~~1/500 - 1/2000
IHC~~1:200~~1000

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MAP4K4 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

MAP4K4 Antibody - Protein Information

Name MAP4K4 ([HGNC:6866](#))

Synonyms HGK, KIAA0687, NIK

Function

Serine/threonine kinase that plays a role in the response to environmental stress and cytokines such as TNF-alpha. Appears to act upstream of the JUN N-terminal pathway (PubMed:<[a href="http://www.uniprot.org/citations/9890973" target="_blank">9890973\). Activator of the Hippo signaling pathway which plays a pivotal role in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. MAP4Ks act in parallel to and are partially redundant with STK3/MST2 and STK4/MST2 in the phosphorylation and activation of LATS1/2, and establish MAP4Ks as components of the expanded Hippo pathway \(PubMed:<\[a href="http://www.uniprot.org/citations/26437443" target="_blank">26437443\\). Phosphorylates SMAD1 on Thr- 322 \\(PubMed:<\\[a href="http://www.uniprot.org/citations/21690388" target="_blank">21690388\\\).\\]\\(http://www.uniprot.org/citations/21690388\\)\]\(http://www.uniprot.org/citations/26437443\)](http://www.uniprot.org/citations/9890973)

Cellular Location

Cytoplasm.

Tissue Location

Widely expressed. Isoform 5 is abundant in the brain. Isoform 4 is predominant in the liver, skeletal muscle and placenta.

MAP4K4 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
