

**UBE2C Antibody**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AO1963a**

**Specification**

**UBE2C Antibody - Product Information**

|                   |                        |
|-------------------|------------------------|
| Application       | <b>E, WB, IHC</b>      |
| Primary Accession | <a href="#">O00762</a> |
| Reactivity        | <b>Human</b>           |
| Host              | <b>Mouse</b>           |
| Clonality         | <b>Monoclonal</b>      |

| Calculated MW     | <b>19.7kDa KDa</b>     |

**Description**

The modification of proteins with ubiquitin is an important cellular mechanism for targeting abnormal or short-lived proteins for degradation. Ubiquitination involves at least three classes of enzymes: ubiquitin-activating enzymes, ubiquitin-conjugating enzymes, and ubiquitin-protein ligases. This gene encodes a member of the E2 ubiquitin-conjugating enzyme family. The encoded protein is required for the destruction of mitotic cyclins and for cell cycle progression, and may be involved in cancer progression. Multiple transcript variants encoding different isoforms have been found for this gene. Pseudogenes of this gene have been defined on chromosomes 4, 14, 15, 18, and 19.

**Immunogen**

Purified recombinant fragment of human UBE2C (AA: FULL(1-179)) expressed in E. Coli.

**Formulation**

Purified antibody in PBS with 0.05% sodium azide.

**UBE2C Antibody - Additional Information**

**Gene ID** 11065

**Other Names**

Ubiquitin-conjugating enzyme E2 C, 6.3.2.19, UbcH10, Ubiquitin carrier protein C, Ubiquitin-protein ligase C, UBE2C, UBCH10

**Dilution**

E~~1/10000  
WB~~1/200 - 1/1000  
IHC~~1/200 - 1/1000

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

UBE2C Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## UBE2C Antibody - Protein Information

**Name** UBE2C

**Synonyms** UBCH10

### Function

Accepts ubiquitin from the E1 complex and catalyzes its covalent attachment to other proteins. In vitro catalyzes 'Lys-11'- and 'Lys-48'-linked polyubiquitination. Acts as an essential factor of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated ubiquitin ligase that controls progression through mitosis. Acts by initiating 'Lys-11'-linked polyubiquitin chains on APC/C substrates, leading to the degradation of APC/C substrates by the proteasome and promoting mitotic exit.

## UBE2C Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
