**GRM5 - Protein Information**

**Name** GRM5

**Synonyms** GPRC1E, MGLUR5

**Function**

G-protein coupled receptor for glutamate. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream effectors. Signaling activates a phosphatidylinositol- calcium second messenger

system and generates a calcium-activated chloride current. Plays an important role in the regulation of synaptic plasticity and the modulation of the neural network activity.

### Cellular Location

Cell membrane; Multi-pass membrane protein
