

**HA Tag Antibody**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP1012A****Specification**

---

**HA Tag Antibody - Product Information**

Application	<b>IF, CHIP, WB,E</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>
Isotype	<b>Rabbit IgG</b>

**HA Tag Antibody - Additional Information****Other Names**

Glutathione S-transferase

**Target/Specificity**

KLH conjugated synthetic peptide encoding HA tag (CYPYDVPDYAYPYDVPDYA) was used as antigen.

**Dilution**

IF~~1:10~50

CHIP~~1:100

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

HA Tag Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**HA Tag Antibody - Protein Information****HA Tag Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**HA Tag Antibody - Images**

GTPase activity of dynamin-2 is required for endocytosis of cell-surface tTG. MRC-5 fibroblasts were transiently transfected with either wild-type (wt) or a GTPase-deficient dynamin-2 mutant (K44A) with a hemagglutinin (HA) tag. (Provided by Evgeny A. Zemskov, Irina Mikhailenko: *Journal of Cell Science* 120, 3188-3199 (2007))

ChIP was performed with 35S:HATCL1 plants using anti-HA antibodies. Rabbit preimmune serum was used as a mock control. Primer sets specific for the first intron or the 3-UTR region of GL1 were used in PCR reactions. ACTIN2 provided a control. (Provided by Shucai Wang, Su-Hwan Kwak: *Development* 134, 3873-3882 (2007))

Western blot analysis of anti-HA tag pab(Cat. #AP1012a)in HA-tagged recombinant protein bacterial lysate.

Western blot analysis of lysate from 12 tag recombinant protein cell line, using Tag-HA. 2x Antibody (Cat. #AP1012A). AP1012A was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.

Western blot analysis of Tag-HA. 2x Antibody (arrow) using rabbit polyclonal AP1012A (Cat. #AP1012A). 293T/17 cell lysates either nontransfected (Lane 1) or transiently transfected (Lane 2) with 41kDa HA tagged vector.

### HA Tag Antibody - Background

Epitope tags consisting of short sequences recognized by well-characterized antibodies have been widely used in the study of protein expression in various systems. The HA tag (YPYDVPDYAYPYDVPDYA) is an established example. Abgent's anti-HA polyclonal antibody provides a simple solution to detect the expression of an HA-tagged protein in cells.
