

ACTB Antibody
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP10168a**Specification**

ACTB Antibody - Product Information

Application	WB, IHC-P, FC,E
Primary Accession	P60709
Other Accession	A2BDB0 , P63259 , P63260 , P63261 , Q5ZMQ2 , P63258 , P60711 , Q6QAO1 , P60710 , Q4R561 , P60706 , P60712 , P53505 , NP_001092.1 , P60708 , P60713
Reactivity	Human
Predicted	Xenopus, Bovine, Chicken, Horse, Monkey, Mouse, Pig, Rat, Sheep
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG

ACTB Antibody - Additional Information**Gene ID** 60**Other Names**

Actin, cytoplasmic 1, Beta-actin, Actin, cytoplasmic 1, N-terminally processed, ACTB

Target/Specificity

This ACTB antibody is generated from rabbits immunized with a recombinant protein from human ACTB.

Dilution

WB~~1:500-1:1000

IHC-P~~1:50~100

FC~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ACTB Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ACTB Antibody - Protein Information

Name ACTB

Function Actin is a highly conserved protein that polymerizes to produce filaments that form cross-linked networks in the cytoplasm of cells (PubMed:[25255767](#), PubMed:[29581253](#)). Actin exists in both monomeric (G-actin) and polymeric (F-actin) forms, both forms playing key functions, such as cell motility and contraction (PubMed:[29581253](#)). In addition to their role in the cytoplasmic cytoskeleton, G- and F- actin also localize in the nucleus, and regulate gene transcription and motility and repair of damaged DNA (PubMed:[29925947](#)). Part of the ACTR1A/ACTB filament around which the dynactin complex is built. The dynactin multiprotein complex activates the molecular motor dynein for ultra-processive transport along microtubules (By similarity).

Cellular Location

Cytoplasm, cytoskeleton. Nucleus Note=Localized in cytoplasmic mRNP granules containing untranslated mRNAs.

ACTB Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ACTB Antibody - Images

Western blot analysis of lysates from A431, HepG2 cell line (from left to right), using ACTB Antibody (Cat. #AP10168a). AP10168a was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysates at 20ug per lane.

ACTB Antibody (Cat. #AP10168a) immunohistochemistry analysis in formalin fixed and paraffin embedded human tonsil tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the ACTB Antibody for immunohistochemistry. Clinical relevance has not been evaluated.

ACTB Antibody (Cat. #AP10168a) flow cytometric analysis of Jurkat cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

ACTB Antibody - Background

This gene encodes one of six different actin proteins. Actins are highly conserved proteins that are involved in cell motility, structure, and integrity. This actin is a major constituent of the contractile apparatus and one of the two nonmuscle cytoskeletal actins.
