Target/Specificity

This BCL11B antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 307-334 amino acids from the Central region of human BCL11B.

Dilution

WB~~1:16000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

BCL11B Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

BCL11B Antibody (Center) - Protein Information**Name** BCL11B

Synonyms CTIP2, RIT1

Function Key regulator of both differentiation and survival of T- lymphocytes during thymocyte development in mammals. Essential in controlling the responsiveness of hematopoietic stem cells to chemotactic signals by modulating the expression of the receptors CCR7 and CCR9, which direct the movement of progenitor cells from the bone marrow to the thymus (PubMed:[27959755](#)). Is a regulator of IL2 promoter and enhances IL2 expression in activated CD4(+) T-lymphocytes (PubMed:[16809611](#)). Tumor-suppressor that represses transcription through direct, TFCOUP2-independent binding to a GC-rich response element (By similarity). May also function in the P53-signaling pathway (By similarity).

Cellular Location

Nucleus.

Tissue Location

Highly expressed in brain and in malignant T-cell lines derived from patients with adult T-cell leukemia/lymphoma

BCL11B Antibody (Center) - Background

This gene encodes a C2H2-type zinc finger protein and is closely related to BCL11A, a gene whose translocation may be associated with B-cell malignancies. The specific function of this gene has not yet been determined. Two alternatively spliced transcript variants, which encode distinct isoforms, have been reported.
