

**AASS Antibody (C-term)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP11094b****Specification**

---

**AASS Antibody (C-term) - Product Information**

|                   |                             |
|-------------------|-----------------------------|
| Application       | <b>WB, FC,E</b>             |
| Primary Accession | <a href="#">O9UDR5</a>      |
| Other Accession   | <a href="#">NP_005754.2</a> |
| Reactivity        | <b>Human</b>                |
| Host              | <b>Rabbit</b>               |
| Clonality         | <b>Polyclonal</b>           |
| Isotype           | <b>Rabbit IgG</b>           |
| Calculated MW     | <b>102132</b>               |
| Antigen Region    | <b>805-834</b>              |

**AASS Antibody (C-term) - Additional Information****Gene ID** 10157**Other Names**

Alpha-aminoadipic semialdehyde synthase, mitochondrial, LKR/SDH, Lysine ketoglutarate reductase, LKR, LOR, Saccharopine dehydrogenase, SDH, AASS

**Target/Specificity**

This AASS antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 805-834 amino acids from the C-terminal region of human AASS.

**Dilution**WB~~1:1000  
FC~~1:10~50**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

AASS Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**AASS Antibody (C-term) - Protein Information****Name** AASS ([HGNC:17366](#))

**Function** Bifunctional enzyme that catalyzes the first two steps in lysine degradation.

**Cellular Location**

Mitochondrion.

**Tissue Location**

Expressed in all 16 tissues examined with highest expression in the liver

**AASS Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**AASS Antibody (C-term) - Images**

AASS Antibody (C-term) (Cat. #AP11094b) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the AASS antibody detected the AASS protein (arrow).

AASS Antibody (C-term) (Cat. #AP11094b) flow cytometric analysis of K562 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

#### **AASS Antibody (C-term) - Background**

This gene encodes a bifunctional enzyme that catalyzes the first two steps in the mammalian lysine degradation pathway. The N-terminal and the C-terminal portions of this enzyme contain lysine-ketoglutarate reductase and saccharopine dehydrogenase activity, respectively, resulting in the conversion of lysine to alpha-aminoadipic semialdehyde. Mutations in this gene are associated with familial hyperlysinemia.
