

DBH Antibody (N-term P42)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP11226A

Specification

DBH Antibody (N-term P42) - Product Information

Application	IF, WB,E
Primary Accession	P09172
Other Accession	NP_000778
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	27-56

DBH Antibody (N-term P42) - Additional Information

Gene ID 1621

Other Names

Dopamine beta-hydroxylase, Dopamine beta-monoxygenase, Soluble dopamine beta-hydroxylase, DBH

Target/Specificity

This DBH antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 27-56 amino acids from the N-terminal region of human DBH.

Dilution

IF~~1:25

WB~~1:2000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

DBH Antibody (N-term P42) is for research use only and not for use in diagnostic or therapeutic procedures.

DBH Antibody (N-term P42) - Protein Information

Name DBH

Function Catalyzes the hydroxylation of dopamine to noradrenaline (also known as

norepinephrine), and is thus vital for regulation of these neurotransmitters.

Cellular Location

[Soluble dopamine beta-hydroxylase]: Cytoplasmic vesicle, secretory vesicle lumen Cytoplasmic vesicle, secretory vesicle, chromaffin granule lumen. Secreted

DBH Antibody (N-term P42) - Protocols

Provided below are standard protocols that you may find useful for product applications.

DBH Antibody (N-term P42) - Images

Immunofluorescent analysis of 4% paraformaldehyde-fixed, 0.1% Triton X-100 permeabilized HeLa (human cervical epithelial adenocarcinoma cell line) cells labeling DBH with AP11226a at 1/25 dilution, followed by Dylight® 488-conjugated goat anti-rabbit IgG (NK179883) secondary antibody at 1/200 dilution (green). Immunofluorescence image showing cytoplasm and weak nucleus staining on HeLa cell line. Cytoplasmic actin is detected with Dylight® 554 Phalloidin (PD18466410) at 1/100 dilution (red).The nuclear counter stain is DAPI (blue).

All lanes : Anti-DBH Antibody (N-term P42) at 1:2000 dilution Lane 1: SH-SY5Y whole cell lysate Lane 2: mouse adrenal gland lysate Lane 3: rat adrenal gland lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 69 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

DBH Antibody (N-term P42) - Background

The protein encoded by this gene is an oxidoreductase belonging to the copper type II, ascorbate-dependent monooxygenase family. It is present in the synaptic vesicles of postganglionic sympathetic neurons and converts dopamine to norepinephrine. It exists in both soluble and membrane-bound forms, depending on the absence or presence, respectively, of a signal peptide. [provided by RefSeq].
