

TUFM Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP12916b

Specification

TUFM Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	P49411
Other Accession	P85834 , Q8BFR5 , NP_003312.3
Reactivity	Human
Predicted	Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	49875
Antigen Region	342-370

TUFM Antibody (C-term) - Additional Information

Gene ID 7284

Other Names

Elongation factor Tu, mitochondrial, EF-Tu, P43, TUFM

Target/Specificity

This TUFM antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 342-370 amino acids from the C-terminal region of human TUFM.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TUFM Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

TUFM Antibody (C-term) - Protein Information

Name TUFM

Function Promotes the GTP-dependent binding of aminoacyl-tRNA to the A-site of ribosomes

during protein biosynthesis. Also plays a role in the regulation of autophagy and innate immunity. Recruits ATG5-ATG12 and NLRX1 at mitochondria and serves as a checkpoint of the RIGI-MAVS pathway. In turn, inhibits RLR-mediated type I interferon while promoting autophagy.

Cellular Location

Mitochondrion.

TUFM Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

TUFM Antibody (C-term) - Images

Western blot analysis of TUFM (arrow) using rabbit polyclonal TUFM Antibody (C-term) (Cat. #AP12916b). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the TUFM gene.

TUFM Antibody (C-term) - Background

This gene encodes a protein which participates in protein translation in mitochondria. Mutations in this gene have been associated with combined oxidative phosphorylation deficiency resulting in lactic acidosis and fatal encephalopathy. A pseudogene has been identified on chromosome 17.
