

**HPSE2 Antibody (C-term)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP12994c****Specification**

---

**HPSE2 Antibody (C-term) - Product Information**

Application	<b>WB, IHC-P,E</b>
Primary Accession	<a href="#">O8WWQ2</a>
Other Accession	<a href="#">B2RY83</a> , <a href="#">NP_001159717.1</a>
Reactivity	<b>Human</b>
Predicted	<b>Mouse</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>
Isotype	<b>Rabbit IgG</b>
Calculated MW	<b>66596</b>
Antigen Region	<b>451-480</b>

**HPSE2 Antibody (C-term) - Additional Information****Gene ID** 60495**Other Names**

Inactive heparanase-2, Hpa2, HPSE2, HPA2

**Target/Specificity**

This HPSE2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 451-480 amino acids from the C-terminal region of human HPSE2.

**Dilution**WB~~1:1000  
IHC-P~~1:10~50**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

HPSE2 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**HPSE2 Antibody (C-term) - Protein Information****Name** HPSE2

## Synonyms HPA2

**Function** Binds heparin and heparan sulfate with high affinity, but lacks heparanase activity. Inhibits HPSE, possibly by competing for its substrates (in vitro).

## Cellular Location

Secreted, extracellular space, extracellular matrix

## Tissue Location

Widely expressed, with the highest expression in brain, mammary gland, prostate, small intestine, testis and uterus. In the central nervous system, expressed in the spinal chord, caudate nucleus, thalamus, substantia nigra, medulla oblongata, putamen and pons. In the urinary bladder, expressed in longitudinal and circular layers of detrusor muscle. Found both in normal and cancer tissues

## HPSE2 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

## HPSE2 Antibody (C-term) - Images

Western blot analysis of lysates from HeLa, Jurkat cell line (from left to right), using HPSE2 Antibody (C-term)(Cat. #AP12994c). AP12994c was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35ug per lane.

HPSE2 Antibody (C-term) (Cat. #AP12994c) immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of HPSE2 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

#### **HPSE2 Antibody (C-term) - Background**

Endoglycosidase which is a cell surface and extracellular matrix-degrading enzyme. Cleaves heparan sulfate proteoglycans (HSPGs) into heparan sulfate side chains and core proteoglycans. Also implicated in the extravasation of leukocytes and tumor cell lines. Due to its contribution to metastasis and angiogenesis, it is considered to be a potential target for anti-cancer therapies.
