

CD1C Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP13430b

Specification

CD1C Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	P29017
Other Accession	NP_001756.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	37654
Antigen Region	226-253

CD1C Antibody (C-term) - Additional Information

Gene ID 911

Other Names

T-cell surface glycoprotein CD1c, CD1c, CD1C

Target/Specificity

This CD1C antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 226-253 amino acids from the C-terminal region of human CD1C.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CD1C Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

CD1C Antibody (C-term) - Protein Information

Name CD1C

Function Antigen-presenting protein that binds self and non-self lipid and glycolipid antigens and presents them to T-cell receptors on natural killer T-cells.

Cellular Location

Cell membrane; Single-pass type I membrane protein. Endosome membrane; Single-pass type I membrane protein Lysosome. Note=Subject to intracellular trafficking between the cell membrane and endosomes

Tissue Location

Expressed on cortical thymocytes, on certain T-cell leukemias, and in various other tissues

CD1C Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

CD1C Antibody (C-term) - Images

CD1C Antibody (C-term) (Cat. #AP13430b) western blot analysis in NCI-H460 cell line lysates (35ug/lane). This demonstrates the CD1C antibody detected the CD1C protein (arrow).

Western blot analysis of CD1C (arrow) using rabbit polyclonal CD1C Antibody (C-term) (Cat. #AP13430b). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the CD1C gene.

CD1C Antibody (C-term) - Background

This gene encodes a member of the CD1 family of transmembrane glycoproteins, which are structurally related to the major histocompatibility complex (MHC) proteins and form heterodimers with beta-2-microglobulin. The CD1 proteins mediate the presentation of primarily lipid and glycolipid antigens of self or microbial origin to T cells. The human genome contains five CD1 family genes organized in a cluster on chromosome 1. The CD1 family members are thought to differ in their cellular localization and specificity for particular lipid ligands. The protein encoded by this gene is broadly distributed throughout the endocytic system via a tyrosine-based motif in the cytoplasmic tail. Alternatively spliced transcript variants of this gene have been observed, but their full-length nature is not known.
