WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SSTR1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SSTR1 Antibody (C-term) - Protein Information

Name SSTR1

Function Receptor for somatostatin with higher affinity for somatostatin-14 than -28. This

receptor is coupled via pertussis toxin sensitive G proteins to inhibition of adenylyl cyclase. In addition it stimulates phosphotyrosine phosphatase and Na(+)/H(+) exchanger via pertussis toxin insensitive G proteins.

Cellular Location

Cell membrane; Multi-pass membrane protein.

Tissue Location

Fetal kidney, fetal liver, and adult pancreas, brain, lung, jejunum and stomach

SSTR1 Antibody (C-term) - Background

Somatostatin acts at many sites to inhibit the release of many hormones and other secretory proteins. The biological effects of somatostatin are probably mediated by a family of G protein-coupled receptors that are expressed in a tissue-specific manner. The encoded protein is a member of the superfamily of somatostatin receptors having seven transmembrane segments, and is expressed in highest levels in jejunum and stomach. [provided by RefSeq].
