

FARSB Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP14090b

Specification

FARSB Antibody (C-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	O9NSD9
Other Accession	NP_005678.3
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	66116
Antigen Region	535-564

FARSB Antibody (C-term) - Additional Information

Gene ID 10056

Other Names

Phenylalanine--tRNA ligase beta subunit, Phenylalanyl-tRNA synthetase beta subunit, PheRS, FARSB, FARSLB, FRSB

Target/Specificity

This FARSB antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 535-564 amino acids from the C-terminal region of human FARSB.

Dilution

WB~~1:1000
IHC-P~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

FARSB Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

FARSB Antibody (C-term) - Protein Information

Name FARSB

Synonyms FARSLB, FRSB

Cellular Location

Cytoplasm.

FARSB Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

FARSB Antibody (C-term) - Images

FARSB Antibody (C-term) (Cat. #AP14090b) western blot analysis in Y79 cell line lysates (35ug/lane). This demonstrates the FARSB antibody detected the FARSB protein (arrow).

FARSB Antibody (C-term) (Cat. #AP14090b) immunohistochemistry analysis in formalin fixed and paraffin embedded human cerebellum tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of ANKS1B FARSB Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

FARSB Antibody (C-term) - Background

This gene encodes a highly conserved enzyme that belongs to the aminoacyl-tRNA synthetase class IIc subfamily. This enzyme comprises the regulatory beta subunits that form a tetramer with two catalytic alpha subunits. In the presence of ATP, this tetramer is responsible for attaching L-phenylalanine to the terminal adenosine of the appropriate tRNA. A pseudogene located on chromosome 10 has been identified.
