

IBSP Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP14114a

Specification

IBSP Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	P21815
Other Accession	NP_004958.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	35148
Antigen Region	70-99

IBSP Antibody (N-term) - Additional Information

Gene ID 3381

Other Names

Bone sialoprotein 2, Bone sialoprotein II, BSP II, Cell-binding sialoprotein, Integrin-binding sialoprotein, IBSP, BNSP

Target/Specificity

This IBSP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 70-99 amino acids from the N-terminal region of human IBSP.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

IBSP Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

IBSP Antibody (N-term) - Protein Information

Name IBSP

Synonyms BNSP

Function Binds tightly to hydroxyapatite (PubMed:[11459848](#)). Appears to form an integral part of the mineralized matrix (PubMed:[1818768](#)). Probably important to cell-matrix interaction (PubMed:[1818768](#)). Promotes adhesion and migration of various cells via the alpha-V/beta-3 integrin receptor (ITGAV:ITGB3) (PubMed:[10640428](#), PubMed:[11459848](#), PubMed:[24103036](#)).

Cellular Location

Secreted.

Tissue Location

Expressed in bone (at protein level) (PubMed:11459848). Expressed in trophoblast cells of placenta (at protein level) (PubMed:1818768). Expressed in brain (PubMed:36261010)

IBSP Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

IBSP Antibody (N-term) - Images

IBSP Antibody (N-term) (Cat. #AP14114a) western blot analysis in CEM cell line lysates (35ug/lane). This demonstrates the IBSP antibody detected the IBSP protein (arrow).

IBSP Antibody (N-term) - Background

The protein encoded by this gene is a major structural protein of the bone matrix. It constitutes approximately 12% of the noncollagenous proteins in human bone and is synthesized by skeletal-associated cell types, including hypertrophic chondrocytes, osteoblasts, osteocytes, and osteoclasts. The only extraskelatal site of its synthesis is the trophoblast. This protein binds to calcium and hydroxyapatite via its acidic amino acid clusters, and mediates cell attachment through an RGD sequence

that recognizes the vitronectin receptor.
