

**CYP2D6 Antibody (N-term)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP14520A**

## Specification

---

### CYP2D6 Antibody (N-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	<a href="#">P10635</a>
Other Accession	<a href="#">P12939</a> , <a href="#">P10633</a>
Reactivity	Human
Predicted	Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	76-105

### CYP2D6 Antibody (N-term) - Additional Information

**Gene ID** 1565

#### Other Names

Cytochrome P450 2D6, CYP11D6, Cytochrome P450-DB1, Debrisoquine 4-hydroxylase, CYP2D6, CYP2DL1

#### Target/Specificity

This CYP2D6 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 76-105 amino acids from the N-terminal region of human CYP2D6.

#### Dilution

WB~~1:1000  
IHC-P~~1:10~50

#### Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

CYP2D6 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

### CYP2D6 Antibody (N-term) - Protein Information

**Name** CYP2D6 {ECO:0000303|PubMed:21289075, ECO:0000312|HGNC:HGNC:2625}

**Function** A cytochrome P450 monooxygenase involved in the metabolism of fatty acids, steroids and retinoids (PubMed:[18698000](#), PubMed:[19965576](#), PubMed:[20972997](#), PubMed:[21289075](#), PubMed:[21576599](#)). Mechanistically, uses molecular oxygen inserting one oxygen atom into a substrate, and reducing the second into a water molecule, with two electrons provided by NADPH via cytochrome P450 reductase (NADPH--hemoprotein reductase) (PubMed:[18698000](#), PubMed:[19965576](#), PubMed:[20972997](#), PubMed:[21289075](#), PubMed:[21576599](#)). Catalyzes the epoxidation of double bonds of polyunsaturated fatty acids (PUFA) (PubMed:[19965576](#), PubMed:[20972997](#)). Metabolizes endocannabinoid arachidonylethanolamide (anandamide) to 20-hydroxyeicosatetraenoic acid ethanolamide (20-HETE-EA) and 8,9-, 11,12-, and 14,15-epoxyeicosatrienoic acid ethanolamides (EpETrE-EAs), potentially modulating endocannabinoid system signaling (PubMed:[18698000](#), PubMed:[21289075](#)). Catalyzes the hydroxylation of carbon-hydrogen bonds. Metabolizes cholesterol toward 25- hydroxycholesterol, a physiological regulator of cellular cholesterol homeostasis (PubMed:[21576599](#)). Catalyzes the oxidative transformations of all-trans retinol to all-trans retinal, a precursor for the active form all-trans-retinoic acid (PubMed:[10681376](#)). Also involved in the oxidative metabolism of drugs such as antiarrhythmics, adrenoceptor antagonists, and tricyclic antidepressants.

#### Cellular Location

Endoplasmic reticulum membrane; Peripheral membrane protein. Microsome membrane; Peripheral membrane protein

#### CYP2D6 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

#### CYP2D6 Antibody (N-term) - Images

Anti-CYP2D6 Antibody (N-term) at 1:1000 dilution + K562 whole cell lysate Lysates/proteins at 20

µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 56 kDa Blocking/Dilution buffer: 5% NFD/MTBST.

CYP2D6 Antibody (N-term) (AP14520a) immunohistochemistry analysis in formalin fixed and paraffin embedded human liver tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of CYP2D6 Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

#### **CYP2D6 Antibody (N-term) - Background**

This gene encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. This protein localizes to the endoplasmic reticulum and is known to metabolize as many as 20% of commonly prescribed drugs. Its substrates include debrisoquine, an adrenergic-blocking drug; sparteine and propafenone, both anti-arrhythmic drugs; and amitriptyline, an anti-depressant. The gene is highly polymorphic in the population; certain alleles result in the poor metabolizer phenotype, characterized by a decreased ability to metabolize the enzyme's substrates. The gene is located near two cytochrome P450 pseudogenes on chromosome 22q13.1. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
