

Alkaline Phosphatase (ALPI) Antibody (Center)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP1480c

Specification

Alkaline Phosphatase (ALPI) Antibody (Center) - Product Information

| | |
|-------------------|------------------------|
| Application | IF, WB, IHC-P,E |
| Primary Accession | P09923 |
| Reactivity | Human |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | Rabbit IgG |
| Antigen Region | 274-304 |

Alkaline Phosphatase (ALPI) Antibody (Center) - Additional Information

Gene ID 248

Other Names

Intestinal-type alkaline phosphatase, IAP, Intestinal alkaline phosphatase, ALPI

Target/Specificity

This Alkaline Phosphatase (ALPI) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 274-304 amino acids from the Central region of human Alkaline Phosphatase (ALPI).

Dilution

IF~~1:100
WB~~1:1000
IHC-P~~1:100

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Alkaline Phosphatase (ALPI) Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

Alkaline Phosphatase (ALPI) Antibody (Center) - Protein Information

Name ALPI

Function Alkaline phosphatase that can hydrolyze various phosphate compounds.

Cellular Location

Cell membrane {ECO:0000250|UniProtKB:P15693}; Lipid-anchor, GPI-anchor {ECO:0000250|UniProtKB:P15693}

Alkaline Phosphatase (ALPI) Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Alkaline Phosphatase (ALPI) Antibody (Center) - Images

Fluorescent confocal image of HeLa cells stained with Alkaline Phosphatase (ALPI) (Center) antibody. HeLa cells were fixed with 4% PFA (20 min), permeabilized with Triton X-100 (0.2%, 30 min). Cells were then incubated with AP1480c Alkaline Phosphatase (ALPI) (Center) primary antibody (1:100, 2 h at room temperature). For secondary antibody, Alexa Fluor® 488 conjugated donkey anti-rabbit antibody (green) was used (1:1000, 1h). Nuclei were counterstained with Hoechst 33342 (blue) (10 µg/ml, 5 min). Alkaline Phosphatase (ALPI) immunoreactivity is localized to the cytoplasm of HeLa cells.

Western blot analysis of lysate from human placenta tissue, using ALPI Antibody (Center)(Cat. #AP1480c). AP1480c was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug per lane.

Western blot analysis of lysate from human placenta tissue lysate, using ALPI Antibody (Center)(Cat. #AP1480c). AP1480c was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysate at 20ug.

Immunohistochemical analysis of paraffin-embedded H. small intestine section using Alkaline Phosphatase (ALPI) Antibody(Center) (Cat#AP1480c). AP1480c was diluted at 1:100 dilution. A peroxidase-conjugated goat anti-rabbit IgG at 1:400 dilution was used as the secondary antibody, followed by DAB staining.

Alkaline Phosphatase (ALPI) Antibody (Center) - Background

There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The intestinal alkaline phosphatase gene encodes a digestive brush-border enzyme. This enzyme is upregulated during small intestinal epithelial cell differentiation.
