

**TBX3 Antibody (Center)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP14976c**

**Specification**

---

**TBX3 Antibody (Center) - Product Information**

Application	WB,E
Primary Accession	<a href="#">O15119</a>
Other Accession	<a href="#">NP_057653.3</a> , <a href="#">NP_005987.3</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	79389
Antigen Region	310-338

**TBX3 Antibody (Center) - Additional Information**

**Gene ID** 6926

**Other Names**

T-box transcription factor TBX3, T-box protein 3, TBX3

**Target/Specificity**

This TBX3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 310-338 amino acids from the Central region of human TBX3.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

TBX3 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**TBX3 Antibody (Center) - Protein Information**

**Name** TBX3

**Function** Transcriptional repressor involved in developmental processes (PubMed:[10468588](#)). Binds to the palindromic T site 5'- TTCACACCTAGGTGTGAA-3' DNA sequence, or a half-site, which

are present in the regulatory region of several genes (PubMed:[12000749](#)). Probably plays a role in limb pattern formation (PubMed:[10468588](#)). Required for mammary placode induction, and maintenance of the mammary buds during development (By similarity). Involved in branching morphogenesis in both developing lungs and adult mammary glands, via negative modulation of target genes; acting redundantly with TBX2 (By similarity). Required, together with TBX2, to maintain cell proliferation in the embryonic lung mesenchyme; perhaps acting downstream of SHH, BMP and TGFbeta signaling (By similarity). Involved in modulating early inner ear development, acting independently of, and also redundantly with, TBX2 in different subregions of the developing ear (By similarity). Acts as a negative regulator of PML function in cellular senescence (PubMed:[22002537](#)).

#### Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00201}.

#### Tissue Location

Widely expressed.

### TBX3 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

### TBX3 Antibody (Center) - Images

TBX3 Antibody (Center) (Cat. #AP14976c) western blot analysis in SK-BR-3 cell line lysates (35ug/lane). This demonstrates the TBX3 antibody detected the TBX3 protein (arrow).

### TBX3 Antibody (Center) - Background

This gene is a member of a phylogenetically conserved family of genes that share a common DNA-binding domain, the T-box. T-box genes encode transcription factors involved in the regulation

of developmental processes. This protein is a transcriptional repressor and is thought to play a role in the anterior/posterior axis of the tetrapod forelimb. Mutations in this gene cause ulnar-mammary syndrome, affecting limb, apocrine gland, tooth, hair, and genital development. Alternative splicing of this gene results in three transcript variants encoding different isoforms; however, the full length nature of one variant has not been determined.
