**Target/Specificity**

This GGPS1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 174-202 amino acids from the Central region of human GGPS1.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

GGPS1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**GGPS1 Antibody (Center) - Protein Information**

**Name** GGPS1

**Function** Catalyzes the trans-addition of the three molecules of IPP onto DMAPP to form geranylgeranyl pyrophosphate, an important precursor of carotenoids and geranylated proteins.

**GGPS1 Antibody (Center) - Background**

This gene is a member of the prenyltransferase family and encodes a protein with geranylgeranyl diphosphate (GGPP) synthase activity. The enzyme catalyzes the synthesis of GGPP from farnesyl diphosphate and isopentenyl diphosphate. GGPP is an important molecule responsible for the C20-prenylation of proteins and for the regulation of a nuclear hormone receptor. Alternate transcriptional splice variants, both protein-coding and

non-protein-coding, have been found for this gene. [provided by RefSeq].
