Other Names

Asparagine synthetase [glutamine-hydrolyzing], Cell cycle control protein TS11,
Glutamine-dependent asparagine synthetase, ASNS, TS11

Target/Specificity

This ASNS antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 120-147 amino acids from the N-terminal region of human ASNS.

ASNS Antibody (N-term) - Background

The protein encoded by this gene is involved in the

synthesis of asparagine. This gene complements a mutation in the temperature-sensitive hamster mutant ts11, which blocks progression through the G1 phase of the cell cycle at nonpermissive temperature. Alternatively spliced transcript variants have been described for this gene.
