

TNNI3 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP17180C

Specification

TNNI3 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	P19429
Other Accession	NP_000354.4
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	86-114

TNNI3 Antibody (Center) - Additional Information

Gene ID 7137

Other Names

Troponin I, cardiac muscle, Cardiac troponin I, TNNI3, TNNC1

Target/Specificity

This TNNI3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 86-114 amino acids from the Central region of human TNNI3.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TNNI3 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

TNNI3 Antibody (Center) - Protein Information

Name TNNI3

Synonyms TNNC1

Function Troponin I is the inhibitory subunit of troponin, the thin filament regulatory complex

which confers calcium-sensitivity to striated muscle actomyosin ATPase activity.

TNNI3 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

TNNI3 Antibody (Center) - Images

TNNI3 Antibody (Center) (Cat. #AP17180c) western blot analysis in mouse stomach tissue lysates (35ug/lane). This demonstrates the TNNI3 antibody detected the TNNI3 protein (arrow).

TNNI3 Antibody (Center) - Background

Troponin I (TnI), along with troponin T (TnT) and troponin C (TnC), is one of 3 subunits that form the troponin complex of the thin filaments of striated muscle. TnI is the inhibitory subunit; blocking actin-myosin interactions and thereby mediating striated muscle relaxation. The TnI subfamily contains three genes: TnI-skeletal-fast-twitch, TnI-skeletal-slow-twitch, and TnI-cardiac. This gene encodes the TnI-cardiac protein and is exclusively expressed in cardiac muscle tissues. Mutations in this gene cause familial hypertrophic cardiomyopathy type 7 (CMH7) and familial restrictive cardiomyopathy (RCM).
