

LARP1B Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP17692b**Specification**

LARP1B Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	O659C4
Other Accession	NP_060548.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	105322
Antigen Region	832-859

LARP1B Antibody (C-term) - Additional Information

Gene ID 55132

Other Names

La-related protein 1B, La ribonucleoprotein domain family member 1B, La ribonucleoprotein domain family member 2, La-related protein 2, LARP1B, LARP2

Target/Specificity

This LARP1B antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 832-859 amino acids from the C-terminal region of human LARP1B.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

LARP1B Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

LARP1B Antibody (C-term) - Protein Information

Name LARP1B

Synonyms LARP2

LARP1B Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

LARP1B Antibody (C-term) - Images

LARP1B Antibody (C-term) (Cat. #AP17692b) western blot analysis in ZR-75-1 cell line lysates (35ug/lane). This demonstrates the LARP1B antibody detected the LARP1B protein (arrow).

LARP1B Antibody (C-term) - Background

This gene encodes a protein containing domains found in the La related protein of *Drosophila melanogaster*. La motif-containing proteins are thought to be RNA-binding proteins, where the La motif and adjacent amino acids fold into an RNA recognition motif. The La motif is also found in proteins unrelated to the La protein. Alternative splicing has been observed at this locus and three variants, encoding distinct isoforms, are described. Additional splice variation has been identified but the full-length nature of these transcripts has not been determined.
