NTAN1 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP17739b

Specification

NTAN1 Antibody (C-term) - Product Information

Application	**WB,E**
Primary Accession	Q96AB6
Other Accession	NP_775745.1
Reactivity	**Human**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**Rabbit IgG**
Calculated MW	**34677**
Antigen Region	**203-230**

NTAN1 Antibody (C-term) - Additional Information

Gene ID 123803

Other Names
Protein N-terminal asparagine amidohydrolase, 351-, Protein NH2-terminal asparagine amidohydrolase, PNAA, Protein NH2-terminal asparagine deamidase, PNAD, Protein N-terminal Asn amidase, Protein N-terminal asparagine amidase, Protein NTN-amidase, NTAN1

Target/Specificity
This NTAN1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 203-230 amino acids from the C-terminal region of human NTAN1.

Dilution
WB~~1:1000

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
NTAN1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

NTAN1 Antibody (C-term) - Protein Information

Name NTAN1

Function N-terminal asparagine deamidase that mediates deamidation of N-terminal asparagine residues to aspartate. Required for the ubiquitin-dependent turnover of intracellular proteins that initiate with Met-Asn. These proteins are acetylated on the retained initiator methionine and can subsequently be modified by the removal of N-acetyl methionine by acylaminoacid hydrolase (AAH). Conversion of the resulting N-terminal asparagine to aspartate by NTAN1/PNAD renders the protein susceptible to arginylation, polyubiquitination and degradation as specified by the N-end rule. This enzyme does not act on substrates with internal or C-terminal asparagines and does not act on glutamine residues in any position, nor on acetylated N-terminal peptidyl Asn.

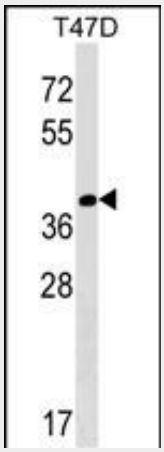
Cellular Location
Cytoplasm {ECO:0000250|UniProtKB:Q28955}.

NTAN1 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

NTAN1 Antibody (C-term) - Images



NTAN1 Antibody (C-term) (Cat. #AP17739b) western blot analysis in T47D cell line lysates (35ug/lane).This demonstrates the NTAN1 antibody detected the NTAN1 protein (arrow).

NTAN1 Antibody (C-term) - Background

Side-chain deamidation of N-terminal asparagine residues to aspartate. Required for the ubiquitin-dependent turnover of intracellular proteins that initiate with Met-Asn. These proteins are acetylated on the retained initiator methionine and can subsequently be modified by the removal of N-acetyl methionine by acylaminoacid hydrolase (AAH). Conversion of the resulting N-terminal asparagine to aspartate by PNAD renders the protein susceptible to arginylation, polyubiquitination and degradation as specified by the N-end rule. This enzyme does not act on substrates with internal or C-terminal asparagines and does not act on glutamine residues in any position (By similarity).
