

PRKCSH Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19155a**Specification**

PRKCSH Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	P14314
Other Accession	Q28034 , NP_002734.2
Reactivity	Human
Predicted	Bovine
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	59425
Antigen Region	6-35

PRKCSH Antibody (N-term) - Additional Information**Gene ID** 5589**Other Names**

Glucosidase 2 subunit beta, 80K-H protein, Glucosidase II subunit beta, Protein kinase C substrate 601 kDa protein heavy chain, PKCSH, PRKCSH, G19P1

Target/Specificity

This PRKCSH antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 6-35 amino acids from the N-terminal region of human PRKCSH.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PRKCSH Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

PRKCSH Antibody (N-term) - Protein Information**Name** PRKCSH {ECO:0000303|PubMed:28375157, ECO:0000312|HGNC:HGNC:9411}

Function Regulatory subunit of glucosidase II that cleaves sequentially the 2 innermost alpha-1,3-linked glucose residues from the Glc(2)Man(9)GlcNAc(2) oligosaccharide precursor of immature glycoproteins (PubMed:[10929008](#)). Required for efficient PKD1/Polycystin-1 biogenesis and trafficking to the plasma membrane of the primary cilia (By similarity).

Cellular Location

Endoplasmic reticulum {ECO:0000255|PROSITE- ProRule:PRU10138, ECO:0000305|PubMed:10929008}

PRKCSH Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

PRKCSH Antibody (N-term) - Images

PRKCSH Antibody (N-term) (Cat. #AP19155a) western blot analysis in HeLa cell line lysates (35ug/lane). This demonstrates the PRKCSH antibody detected the PRKCSH protein (arrow).

PRKCSH Antibody (N-term) - Background

This gene encodes the beta-subunit of glucosidase II, an N-linked glycan-processing enzyme in the endoplasmic reticulum (ER). This protein is an acidic phospho-protein known to be a substrate for protein kinase C. Mutations in this gene have been associated with the autosomal dominant polycystic liver disease (PCLD). Alternatively spliced transcript variants encoding distinct isoforms have been observed.
