

**STARD13 Antibody(Center)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP19692c**

**Specification**

---

**STARD13 Antibody(Center) - Product Information**

Application	WB,E
Primary Accession	<a href="#">O9Y3M8</a>
Other Accession	<a href="#">NP_443083.1</a> , <a href="#">NP_821074.1</a> , <a href="#">NP_821075.1</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	124967
Antigen Region	544-573

**STARD13 Antibody(Center) - Additional Information**

**Gene ID** 90627

**Other Names**

StAR-related lipid transfer protein 13, 46H232, Deleted in liver cancer 2 protein, DLC-2, Rho GTPase-activating protein, START domain-containing protein 13, StARD13, STARD13, DLC2, GT650

**Target/Specificity**

This STARD13 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 544-573 amino acids from the Central region of human STARD13.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

STARD13 Antibody(Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**STARD13 Antibody(Center) - Protein Information**

**Name** STARD13

**Synonyms** DLC2, GT650

**Function** GTPase-activating protein for RhoA, and perhaps for Cdc42. May be involved in regulation of cytoskeletal reorganization, cell proliferation and cell motility. Acts a tumor suppressor in hepatocellular carcinoma cells.

**Cellular Location**

Cytoplasm. Membrane; Peripheral membrane protein; Cytoplasmic side. Mitochondrion membrane; Peripheral membrane protein; Cytoplasmic side. Lipid droplet

**Tissue Location**

Ubiquitously expressed. Underexpressed in hepatocellular carcinoma cells and some breast cancer cell lines

**STARD13 Antibody(Center) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**STARD13 Antibody(Center) - Images**

STARD13 Antibody (Center) (Cat. #AP19692c) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the STARD13 antibody detected the STARD13 protein (arrow).

**STARD13 Antibody(Center) - Background**

This gene encodes a protein that contains a sterile alpha motif domain in the N-terminus, an ATP/GTP-binding motif, a GTPase-activating protein domain, and a STAR-related lipid transfer domain in the C-terminus. The gene is located in a region of chromosome 13 that has loss of heterozygosity in hepatic cancer. At least three alternatively spliced transcript variants have been described for this gene.
