ACVRL1 Antibody (N-term) - Protein Information

Name ACVRL1

Synonyms ACVRLK1, ALK1

Function Type I receptor for TGF-beta family ligands BMP9/GDF2 and BMP10 and important regulator of normal blood vessel development. On ligand binding, forms a receptor complex consisting of two type II and two type I transmembrane serine/threonine kinases. Type II receptors phosphorylate and activate type I receptors which autophosphorylate, then bind and activate SMAD transcriptional regulators. May bind activin as well.

Cellular Location

Cell membrane; Single-pass type I membrane protein
