**MYH14 Antibody (Center) - Protein Information**

**Name** MYH14

## Synonyms KIAA2034

**Function** Cellular myosin that appears to play a role in cytokinesis, cell shape, and specialized functions such as secretion and capping.

## Tissue Location

High levels of expression are found in brain (highest in corpus callosum), heart, kidney, liver, lung, small intestine, colon and skeletal muscle. Expression is low in organs composed mainly of smooth muscle, such as aorta, uterus and urinary bladder. No detectable expression is found in thymus, spleen, placenta and lymphocytes.
