

**ETFFA Antibody (Center)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP20630c****Specification**

---

**ETFFA Antibody (Center) - Product Information**

Application	IF, WB,E
Primary Accession	<a href="#">P13804</a>
Other Accession	<a href="#">Q8HXY0</a>
Reactivity	Human, Mouse
Predicted	Monkey
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	35080

**ETFFA Antibody (Center) - Additional Information****Gene ID** 2108**Other Names**

Electron transfer flavoprotein subunit alpha, mitochondrial, Alpha-ETF, ETFFA

**Target/Specificity**

This ETFFA antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 192-226 amino acids from the Central region of human ETFFA.

**Dilution**

IF~~1:25

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

ETFFA Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**ETFFA Antibody (Center) - Protein Information****Name** ETFFA**Function** Heterodimeric electron transfer flavoprotein that accepts electrons from several

mitochondrial dehydrogenases, including acyl-CoA dehydrogenases, glutaryl-CoA and sarcosine dehydrogenase (PubMed:[10356313](#), PubMed:[15159392](#), PubMed:[15975918](#), PubMed:[27499296](#), PubMed:[9334218](#)). It transfers the electrons to the main mitochondrial respiratory chain via ETF-ubiquinone oxidoreductase (ETF dehydrogenase) (PubMed:[9334218](#)). Required for normal mitochondrial fatty acid oxidation and normal amino acid metabolism (PubMed:[12815589](#), PubMed:[1430199](#), PubMed:[1882842](#)).

#### Cellular Location

Mitochondrion matrix.

#### ETFFA Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### ETFFA Antibody (Center) - Images

Fluorescent image of HeLa cells stained with ETFFA Antibody (Center)(Cat#AP20630c). AP20630c was diluted at 1:25 dilution. An Alexa Fluor 488-conjugated goat anti-rabbit IgG at 1:400 dilution was used as the secondary antibody (green). DAPI was used to stain the cell nuclear (blue). Cytoplasmic actin was counterstained with Alexa Fluor® 555 conjugated with Phalloidin (red).

Western blot analysis of lysates from A431, HeLa, HepG2 cell line , human liver and mouse liver tissue lysate(from left to right), using ETFA Antibody (Center)(Cat. #AP20630c). AP20630c was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35ug per lane.

#### ETF A Antibody (Center) - Background

The electron transfer flavoprotein serves as a specific electron acceptor for several dehydrogenases, including five acyl- CoA dehydrogenases, glutaryl-CoA and sarcosine dehydrogenase. It transfers the electrons to the main mitochondrial respiratory chain via ETF-ubiquinone oxidoreductase (ETF dehydrogenase).
