

RSF1 Antibody (C-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP20734c

Specification

RSF1 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	O96T23
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	163821

RSF1 Antibody (C-term) - Additional Information

Gene ID 51773

Other Names

Remodeling and spacing factor 1, Rsf-1, HBV pX-associated protein 8, Hepatitis B virus X-associated protein, p325 subunit of RSF chromatin-remodeling complex, RSF1, HBXAP, XAP8

Target/Specificity

This RSF1 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 1355-1389 amino acids from the C-terminal region of human RSF1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

RSF1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

RSF1 Antibody (C-term) - Protein Information

Name RSF1

Synonyms HBXAP, XAP8

Function Regulatory subunit of the ATP-dependent RSF-1 and RSF-5 ISWI chromatin-remodeling

complexes, which form ordered nucleosome arrays on chromatin and facilitate access to DNA during DNA-templated processes such as DNA replication, transcription, and repair (PubMed:[12972596](#), PubMed:[28801535](#)). Binds to core histones together with SMARCA5, and is required for the assembly of regular nucleosome arrays by the RSF-5 ISWI chromatin-remodeling complex (PubMed:[12972596](#)). Directly stimulates the ATPase activity of SMARCA1 and SMARCA5 in the RSF-1 and RSF-5 ISWI chromatin-remodeling complexes, respectively (PubMed:[28801535](#)). The RSF-1 ISWI chromatin remodeling complex has a lower ATP hydrolysis rate than the RSF-5 ISWI chromatin-remodeling complex (PubMed:[28801535](#)). The complexes do not have the ability to slide mononucleosomes to the center of a DNA template (PubMed:[28801535](#)). Facilitates transcription of hepatitis B virus (HBV) genes by the pX transcription activator. In case of infection by HBV, together with pX, it represses TNF-alpha induced NF-kappa-B transcription activation. Represses transcription when artificially recruited to chromatin by fusion to a heterogeneous DNA binding domain (PubMed:[11788598](#), PubMed:[11944984](#)).

Cellular Location

Nucleus Note=Localization is diffuse during mitosis (PubMed:[12972596](#)). Co-localizes with SMARCA5 in the nucleus (PubMed:[12972596](#))

Tissue Location

Ubiquitously expressed. Highly expressed in the heart, skeletal muscle, kidney and placenta (PubMed:[12972596](#)) Expressed at low levels in the brain and colon (PubMed:[12972596](#))

RSF1 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)

RSF1 Antibody (C-term) - Images

Western blot analysis of lysate from HeLa cell line, using RSF1 Antibody (C-term)(Cat. #AP20734c). AP20734c was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.

RSF1 Antibody (C-term) - Background

Required for assembly of regular nucleosome arrays by the RSF chromatin-remodeling complex. Facilitates transcription of hepatitis B virus (HBV) genes by the pX transcription activator. In case of infection by HBV, together with pX, it represses TNF- alpha induced NF-kappa-B transcription activation. Represses transcription when artificially recruited to chromatin by fusion to a heterogeneous DNA binding domain.
