

SYCP3 Antibody (N-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP20774a

Specification

SYCP3 Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	Q8IZU3
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	27729

SYCP3 Antibody (N-term) - Additional Information

Gene ID 50511

Other Names

Synaptonemal complex protein 3, SCP-3, SYCP3, SCP3

Target/Specificity

This SYCP3 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 13-46amino acids from the N-terminal region of human SYCP3.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SYCP3 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SYCP3 Antibody (N-term) - Protein Information

Name SYCP3

Synonyms SCP3

Function Component of the synaptonemal complexes (SCS), formed between homologous chromosomes during meiotic prophase. Required for centromere pairing during meiosis in male

germ cells (By similarity). Required for normal meiosis during spermatogenesis and male fertility (PubMed:[14643120](#)). Plays a lesser role in female fertility. Required for efficient phosphorylation of HORMAD1 and HORMAD2 (By similarity).

Cellular Location

Nucleus {ECO:0000250|UniProtKB:Q60547}. Chromosome {ECO:0000250|UniProtKB:Q60547}. Chromosome, centromere {ECO:0000250|UniProtKB:Q60547}. Note=It is present in early unpaired cores, in the lateral domains of the synaptonemal complex and in the chromosome cores when they separate at diplotene. It is found axial to the metaphase I chromosomes and in association with pairs of sister centromeres. The centromere-associated protein becomes dissociated from the centromeres at anaphase II and is not found in mitotic metaphase centromeres. {ECO:0000250|UniProtKB:Q60547}

Tissue Location

Testis-specific.

SYCP3 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

SYCP3 Antibody (N-term) - Images

Western blot analysis of lysate from human testis tissue lysate, using SYCP3 Antibody (N-term)(Cat. #AP20774a). AP20774a was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.

SYCP3 Antibody (N-term) - Background

Component of the transverse filaments of synaptonemal complexes (SCS), formed between homologous chromosomes during meiotic prophase. Has an essential meiotic function in spermatogenesis. May be important for testis development. Required for efficient phosphorylation of HORMAD1 and HORMAD2 (By similarity).
