

UBE2L6 Antibody (N-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP2118a**Specification**

UBE2L6 Antibody (N-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	O14933
Other Accession	NP_937826
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	1-30

UBE2L6 Antibody (N-term) - Additional Information**Gene ID** 9246**Other Names**

Ubiquitin/ISG15-conjugating enzyme E2 L6, Retinoic acid-induced gene B protein, RIG-B, Ubch8, Ubiquitin carrier protein L6, Ubiquitin-protein ligase L6, UBE2L6, UBCH8

Target/Specificity

This UBE2L6 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human UBE2L6.

DilutionWB~~1:1000
IHC-P~~1:50~100**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

UBE2L6 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

UBE2L6 Antibody (N-term) - Protein Information**Name** UBE2L6**Synonyms** UBCH8

Function Catalyzes the covalent attachment of ubiquitin or ISG15 to other proteins. Functions in the E6/E6-AP-induced ubiquitination of p53/TP53. Promotes ubiquitination and subsequent proteasomal degradation of FLT3.

Tissue Location

Present in natural killer cells (at protein level).

UBE2L6 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

UBE2L6 Antibody (N-term) - Images

Western blot analysis of lysate from HL-60 cell line, using UBE2L6 Antibody (M1) (Cat. #AP2118A). AP2118A was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.

Formalin-fixed and paraffin-embedded human hepatocarcinoma reacted with UBE2L6 Antibody (N-term)(Cat.#AP2118a), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

UBE2L6 Antibody (N-term) - Background

The modification of proteins with ubiquitin is an important cellular mechanism for targeting abnormal or short-lived proteins for degradation. Ubiquitination involves at least three classes of enzymes: ubiquitin-activating enzymes (E1s), ubiquitin-conjugating enzymes (E2s) and ubiquitin-protein ligases (E3s). UBE2L6 is a member of the E2 ubiquitin-conjugating enzyme family. This enzyme is demonstrated to function in the E6/E6-ap-induced ubiquitination of p53.
