

ZFYVE20 Antibody (N-Term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP21374a

Specification

ZFYVE20 Antibody (N-Term) - Product Information

Application	WB,E
Primary Accession	O9H1K0
Reactivity	Human
Host	Rabbit
Clonality	polyclonal
Isotype	Rabbit IgG
Calculated MW	88870

ZFYVE20 Antibody (N-Term) - Additional Information

Gene ID 64145

Other Names

Rabenosyn-5, 110 kDa protein, FYVE finger-containing Rab5 effector protein rabenosyn-5, RAB effector RBSN {ECO:0000312|HGNC:HGNC:20759}, Zinc finger FYVE domain-containing protein 20, RBSN ([HGNC:20759](http://www.genenames.org/cgi-bin/gene_symbol_report?hgnc_id=20759))

Target/Specificity

This ZFYVE20 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 41-65 amino acids from the human region of human ZFYVE20.

Dilution

WB~~1:2000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ZFYVE20 Antibody (N-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

ZFYVE20 Antibody (N-Term) - Protein Information

Name RBSN ([HGNC:20759](#))

Function Rab4/Rab5 effector protein acting in early endocytic membrane fusion and membrane

trafficking of recycling endosomes. Required for endosome fusion either homotypically or with clathrin coated vesicles. Plays a role in the lysosomal trafficking of CTSD/cathepsin D from the Golgi to lysosomes. Also promotes the recycling of transferrin directly from early endosomes to the plasma membrane. Binds phospholipid vesicles containing phosphatidylinositol 3-phosphate (PtdInsP3) (PubMed:[11062261](#), PubMed:[11788822](#), PubMed:[15020713](#)). Plays a role in the recycling of transferrin receptor to the plasma membrane (PubMed:[22308388](#)).

Cellular Location

Cell membrane; Lipid-anchor; Cytoplasmic side. Early endosome membrane; Lipid-anchor

Note=Enriched in endosomes that are in close proximity to clathrin- enriched regions at the cell surface.

ZFYVE20 Antibody (N-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
