Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

PPP1R13L Antibody (N-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

**PPP1R13L Antibody (N-Term) - Protein Information**

**Name** PPP1R13L

**Synonyms** IASPP, NKIP1, PPP1R13BL, RAI

**Function** Regulator that plays a central role in regulation of apoptosis and transcription via its interaction with NF-kappa-B and p53/TP53 proteins. Blocks transcription of HIV-1 virus by inhibiting the action of both NF-kappa-B and SP1. Also inhibits p53/TP53 function, possibly by preventing the association between p53/TP53 and ASPP1 or ASPP2, and therefore suppressing the subsequent activation of apoptosis (PubMed:[12524540](#)). Is involved in NF-kappa-B dependent negative regulation of inflammatory response (PubMed:[28069640](#)).

#### **Cellular Location**

Cytoplasm. Nucleus Note=Predominantly cytoplasmic but also nuclear

#### **Tissue Location**

Highly expressed in heart, placenta and prostate. Weakly expressed in brain, liver, skeletal muscle, testis and peripheral blood leukocyte.
