

VLDLR Antibody (C-Term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP21837b

Specification

VLDLR Antibody (C-Term) - Product Information

Application	WB,E
Primary Accession	P98155
Reactivity	Human
Host	Rabbit
Clonality	polyclonal
Isotype	Rabbit IgG
Calculated MW	96098
Antigen Region	608-642

VLDLR Antibody (C-Term) - Additional Information

Gene ID 7436

Other Names

Very low-density lipoprotein receptor, VLDL receptor, VLDL-R, VLDLR

Target/Specificity

This VLDLR antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 608-642 amino acids from human VLDLR.

Dilution

WB~~1:2000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

VLDLR Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

VLDLR Antibody (C-Term) - Protein Information

Name VLDLR

Function Multifunctional cell surface receptor that binds VLDL and transports it into cells by endocytosis and therefore plays an important role in energy metabolism. Binds also to a wide range of other molecules including Reelin/RELN or apolipoprotein E/APOE- containing ligands as

well as clusterin/CLU (PubMed:[24381170](#), PubMed:[30873003](#)). In the off-state of the pathway, forms homooligomers or heterooligomers with LRP8 (PubMed:[30873003](#)). Upon binding to ligands, homooligomers are rearranged to higher order receptor clusters that transmit the extracellular RELN signal to intracellular signaling processes by binding to DAB1 (PubMed:[30873003](#)). This interaction results in phosphorylation of DAB1 leading to the ultimate cell responses required for the correct positioning of newly generated neurons. Later, mediates a stop signal for migrating neurons, preventing them from entering the marginal zone (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein Membrane, clathrin-coated pit; Single-pass type I membrane protein

Tissue Location

Abundant in heart and skeletal muscle; also ovary and kidney; not in liver

VLDLR Antibody (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

VLDLR Antibody (C-Term) - Images

All lanes : Anti-VLDLR Antibody (C-Term) at 1:2000 dilution Lane 1: HeLa whole cell lysate Lane 2: MCF-7 whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 96 kDa Blocking/Dilution buffer: 5% NFDN/TBST.

VLDLR Antibody (C-Term) - Background

Binds VLDL and transports it into cells by endocytosis. In order to be internalized, the receptor-ligand complexes must first cluster into clathrin-coated pits. Binding to Reelin induces tyrosine phosphorylation of Dab1 and modulation of Tau phosphorylation (By similarity).
