**TGFA Antibody (C-Term) - Additional Information****Gene ID** 7039**Other Names**

Protransforming growth factor alpha, Transforming growth factor alpha, TGF-alpha, EGF-like TGF, ETGF, TGF type 1, TGFA

**Target/Specificity**

This TGFA antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 118-150 amino acids from the human region of human TGFA.

**Dilution**

WB~~1:2000

FC~~1:25

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

TGFA Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

**TGFA Antibody (C-Term) - Protein Information****Name** TGFA

**Function** TGF alpha is a mitogenic polypeptide that is able to bind to the EGF receptor/EGFR and to act synergistically with TGF beta to promote anchorage-independent cell proliferation in soft agar.

#### Cellular Location

[Transforming growth factor alpha]: Secreted, extracellular space

#### Tissue Location

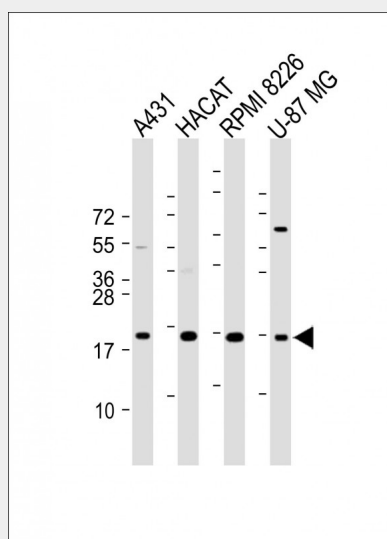

Isoform 1, isoform 3 and isoform 4 are expressed in keratinocytes and tumor-derived cell lines

Overlay histogram showing A431 cells stained with AP22303b (green line). The cells were fixed with 2% paraformaldehyde and then permeabilized with 90% methanol for 10 min. The cells were then incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody (1:25 dilution) for 60 min at 37°C. The secondary antibody used was Goat-Anti-Rabbit IgG, DyLight® 488 Conjugated Highly Cross-Adsorbed at 1/200 dilution for 40 min at Room temperature. Isotype control antibody (blue line) was rabbit IgG1 (1µg/1x10<sup>6</sup> cells) used under the same conditions. Acquisition of >10,000 events was performed.
