

**CPT1A Antibody (C-term)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP2524b**

**Specification**

---

**CPT1A Antibody (C-term) - Product Information**

Application	WB, IHC-P,E
Primary Accession	<a href="#">P50416</a>
Reactivity	Bovine, Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	88368
Antigen Region	606-636

**CPT1A Antibody (C-term) - Additional Information**

**Gene ID** 1374

**Other Names**

Carnitine O-palmitoyltransferase 1, liver isoform, CPT1-L, Carnitine O-palmitoyltransferase I, liver isoform, CPT I, CPTI-L, Carnitine palmitoyltransferase 1A, CPT1A, CPT1

**Target/Specificity**

This CPT1A antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 606-636 amino acids from the C-terminal region of human CPT1A.

**Dilution**

WB~~1:1000

IHC-P~~1:50~100

E~~Use at an assay dependent concentration.

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

CPT1A Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**CPT1A Antibody (C-term) - Protein Information**

**Name** CPT1A ([HGNC:2328](#))

## Synonyms CPT1

**Function** Catalyzes the transfer of the acyl group of long-chain fatty acid-CoA conjugates onto carnitine, an essential step for the mitochondrial uptake of long-chain fatty acids and their subsequent beta-oxidation in the mitochondrion (PubMed:[11350182](#), PubMed:[14517221](#), PubMed:[16651524](#), PubMed:[9691089](#)). Also possesses a lysine succinyltransferase activity that can regulate enzymatic activity of substrate proteins such as ENO1 and metabolism independent of its classical carnitine O-palmitoyltransferase activity (PubMed:[29425493](#)). Plays an important role in hepatic triglyceride metabolism (By similarity). Also plays a role in inducible regulatory T-cell (iTreg) differentiation once activated by butyryl-CoA that antagonizes malonyl-CoA-mediated CPT1A repression (By similarity). Sustains the IFN-I response by recruiting ZDHCC4 to palmitoylate MAVS at the mitochondria leading to MAVS stabilization and activation (PubMed:[38016475](#)). Promotes ROS-induced oxidative stress in liver injury via modulation of NFE2L2 and NLRP3-mediated signaling pathways (By similarity).

## Cellular Location

Mitochondrion outer membrane; Multi-pass membrane protein

## Tissue Location

Strong expression in kidney and heart, and lower in liver and skeletal muscle

## CPT1A Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

## CPT1A Antibody (C-term) - Images

Western blot analysis of anti-CPT1A Pab (Cat. #AP2524b) in Y79 cell line lysate (35ug/lane). CPT1A (arrow) was detected using the purified Pab.

Left image is paraformaldehyde-fixed and paraffin-embedded cow lactating with CPT1A Pab (Cat. #AP2524b), which was peroxidase-conjugated to the secondary antibody, followed by AEC staining, right image is contrast, did not add the antibody. This data was kindly offered by Hideaki Hayashi, University of Bern, Switzerland.

### **CPT1A Antibody (C-term) - Background**

The mitochondrial oxidation of long-chain fatty acids is initiated by the sequential action of carnitine palmitoyltransferase I (which is located in the outer membrane and is detergent-labile) and carnitine palmitoyltransferase II (which is located in the inner membrane and is detergent-stable), together with a carnitine-acylcarnitine translocase. CPT I is the key enzyme in the carnitine-dependent transport across the mitochondrial inner membrane and its deficiency results in a decreased rate of fatty acid beta-oxidation.
