

**SULT2B1a/b Antibody (N-term)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP2604a**

**Specification**

---

**SULT2B1a/b Antibody (N-term) - Product Information**

Application	WB,E
Primary Accession	<a href="#">O00204</a>
Other Accession	<a href="#">NP_814444</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	41308
Antigen Region	1-30

**SULT2B1a/b Antibody (N-term) - Additional Information**

**Gene ID** 6820

**Other Names**

Sulfotransferase family cytosolic 2B member 1, ST2B1, Sulfotransferase 2B1, Alcohol sulfotransferase, Hydroxysteroid sulfotransferase 2, SULT2B1, HSST2

**Target/Specificity**

This SULT2B1a/b antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human SULT2B1a/b.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

SULT2B1a/b Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**SULT2B1a/b Antibody (N-term) - Protein Information**

**Name** SULT2B1

**Synonyms** HSST2

**Function** Sulfotransferase that utilizes 3'-phospho-5'-adenylyl sulfate (PAPS) as sulfonate donor to catalyze the sulfate conjugation. Responsible for the sulfation of cholesterol (PubMed:[12145317](#), PubMed:[19589875](#)). Catalyzes sulfation of the 3beta-hydroxyl groups of steroids, such as, pregnenolone and dehydroepiandrosterone (DHEA) (PubMed:[12145317](#), PubMed:[16855051](#), PubMed:[21855633](#), PubMed:[9799594](#)). Preferentially sulfonates cholesterol, while it has also significant activity with pregnenolone and DHEA (PubMed:[12145317](#), PubMed:[21855633](#)). Plays a role in epidermal cholesterol metabolism and in the regulation of epidermal proliferation and differentiation (PubMed:[28575648](#)).

#### Cellular Location

Cytoplasm, cytosol. Microsome. Nucleus. Note=Phosphorylation of Ser-348 is required for translocation to the nucleus

#### Tissue Location

Expressed in the stratum granulosum-stratum corneum junction in the skin (at protein level) (PubMed:[28575648](#)). Expressed highly in placenta, prostate and trachea and lower expression in the small intestine and lung (PubMed:[9799594](#))

### SULT2B1a/b Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### SULT2B1a/b Antibody (N-term) - Images

Western blot analysis of SULT2B1a/b antibody (N-term) (Cat.# Ap2604a) in HL60 cell line lysates (35ug/lane). SULT2B1a/b (arrow) was detected using the purified Pab.

### SULT2B1a/b Antibody (N-term) - Background

Cytosolic sulfotransferases (STs or SULTs) catalyze the sulfate conjugation of many drugs, xenobiotic compounds, hormones, and neurotransmitters. Her et al. (1998) identified an EST with homology to ST enzymes. By PCR with human placental and prostate cDNA as template, they isolated 2 alternatively spliced cDNAs, identical throughout most of their sequences, but having different 5-prime ends. The shorter cDNA, SULT2B1a, encodes a protein of 350 amino acids; the longer cDNA, SULT2B1b, encodes a 365-amino acid protein. Genomic PCR analysis revealed that the gene encoding both cDNAs, SULT2B1, contains 7 exons, with 2 alternative first exons being used to generate SULT2B1a and SULT2B1b. Northern blot analysis revealed that the SULT2B1 gene is expressed as a 1.4-kb transcript predominantly in prostate, placenta, and trachea.
