

**NOLC1 Antibody**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP50770**

**Specification**

---

**NOLC1 Antibody - Product Information**

Application	<b>WB</b>
Primary Accession	<a href="#">O14978</a>
Reactivity	<b>Human, Mouse, Rat</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>
Calculated MW	<b>74,75(140KD) KDa</b>
Antigen Region	<b>652-681</b>

**NOLC1 Antibody - Additional Information**

**Gene ID** 9221

**Other Names**

Nucleolar and coiled-body phosphoprotein 1, 140 kDa nucleolar phosphoprotein, Nopp140, Hepatitis C virus NS5A-transactivated protein 13, HCV NS5A-transactivated protein 13, Nucleolar 130 kDa protein, Nucleolar phosphoprotein p130, NOLC1, KIAA0035, NS5ATP13

**Dilution**

WB~~ 1:1000

**Format**

Rabbit IgG in phosphate buffered saline (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150mM NaCl, 0.09% (W/V) sodium azide and 50% glycerol.

**Storage Conditions**

-20°C

**NOLC1 Antibody - Protein Information**

**Name** NOLC1 ([HGNC:15608](#))

**Function**

Nucleolar protein that acts as a regulator of RNA polymerase I by connecting RNA polymerase I with enzymes responsible for ribosomal processing and modification (PubMed:<a href="http://www.uniprot.org/citations/10567578" target="\_blank">10567578</a>, PubMed:<a href="http://www.uniprot.org/citations/26399832" target="\_blank">26399832</a>). Required for neural crest specification: following monoubiquitination by the BCR(KBTBD8) complex, associates with TCOF1 and acts as a platform to connect RNA polymerase I with enzymes responsible for ribosomal processing and modification, leading to remodel the translational program of differentiating cells in favor of neural crest specification (PubMed:<a href="http://www.uniprot.org/citations/26399832" target="\_blank">26399832</a>). Involved in nucleogenesis, possibly by playing a role in the maintenance of the fundamental structure of the

fibrillar center and dense fibrillar component in the nucleolus (PubMed:<a href="http://www.uniprot.org/citations/9016786" target="\_blank">9016786</a>). It has intrinsic GTPase and ATPase activities (PubMed:<a href="http://www.uniprot.org/citations/9016786" target="\_blank">9016786</a>).

#### Cellular Location

Nucleus, nucleolus. Cytoplasm. Note=Shuttles between the nucleolus and the cytoplasm. At telophase it begins to assemble into granular-like pre-nucleolar bodies which are subsequently relocated to nucleoli at the early G1-phase.

#### NOLC1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### NOLC1 Antibody - Images

Western blot analysis of lysate from A431 cell line, using NOLC1 Antibody (AP50770). AP50770 was diluted at 1:1000. A goat anti-rabbit IgG H&L (HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35 µg.

#### NOLC1 Antibody - Background

Related to nucleologenesis, may play a role in the maintenance of the fundamental structure of the fibrillar center and dense fibrillar component in the nucleolus. It has intrinsic GTPase and ATPase activities. May play an important role in transcription catalyzed by RNA polymerase I.
