

Anti-Histone H2A (AcK7) Antibody
Catalog # AP54109

Specification

Anti-Histone H2A (AcK7) Antibody - Product Information

Application	WB
Primary Accession	P0C0S5
Other Accession	Q71UI9
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	13553

Anti-Histone H2A (AcK7) Antibody - Additional Information

Gene ID 3015

Other Names

H2AZ; Histone H2A.Z; H2A/z

Target/Specificity

Recognizes endogenous levels of Histone H2A with a site at AcK7 protein.

Format

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage

Store at -20 °C. Stable for 12 months from date of receipt

Anti-Histone H2A (AcK7) Antibody - Protein Information

Name H2AZ1 ([HGNC:4741](#))

Function

Variant histone H2A which replaces conventional H2A in a subset of nucleosomes. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post- translational modifications of histones, also called histone code, and nucleosome remodeling. May be involved in the formation of constitutive heterochromatin. May be required for chromosome segregation during cell division.

Cellular Location

Nucleus. Chromosome.

Anti-Histone H2A (AcK7) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
