Anti-ANKRD1 Antibody - Protein Information**Name** ANKRD1**Synonyms** C193, CARP, HA1A2**Function**

May play an important role in endothelial cell activation. May act as a nuclear transcription factor that negatively regulates the expression of cardiac genes. Induction seems to be correlated with apoptotic cell death in hepatoma cells.

Cellular Location

Nucleus

Tissue Location

Mainly expressed in activated vascular endothelial cells. To a lower extent, also expressed in hepatoma cells

Anti-ANKRD1 Antibody - Images

Western blot analysis of ANKRD1 expression in mouse muscle (A), rat muscle (B) whole cell lysates.

Immunohistochemical analysis of ANKRD1 staining in human lymph node formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with

sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Anti-ANKRD1 Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human ANKRD1. The exact sequence is proprietary.
