## Anti-LIF Antibody - Images

Western blot analysis of LIF expression in HCT116 (A), LO2 (B), mouse testis (C), rat testis (D) whole cell lysates.

Immunohistochemical analysis of LIF staining in human colon cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

## Anti-LIF Antibody - Background
