Anti-UCP3 Antibody - Protein Information**Name** UCP3 {ECO:0000303|PubMed:9180264, ECO:0000312|HGNC:HGNC:12519}**Function**

Putative transmembrane transporter that plays a role in mitochondrial metabolism via an as yet unclear mechanism (PubMed: [21775425](http://www.uniprot.org/citations/21775425), PubMed: [36114012](http://www.uniprot.org/citations/36114012)). Originally, this mitochondrial protein was thought to act as a proton transmembrane transporter from the mitochondrial intermembrane space into the matrix, causing proton leaks through the inner mitochondrial membrane, thereby uncoupling mitochondrial membrane potential generation from ATP synthesis (PubMed: [11171965](http://www.uniprot.org/citations/11171965), PubMed: [12670931](http://www.uniprot.org/citations/12670931), PubMed: [12670931](http://www.uniprot.org/citations/12670931), PubMed: [12670931](http://www.uniprot.org/citations/12670931)).

[12734183](http://www.uniprot.org/citations/12734183), PubMed:<[9305858](http://www.uniprot.org/citations/9305858)>). However, this function is controversial and uncoupling may not be the function, or at least not the main function, but rather a consequence of more conventional metabolite transporter activity (PubMed:<[11707458](http://www.uniprot.org/citations/11707458)>).

Cellular Location

Mitochondrion inner membrane {ECO:0000250|UniProtKB:P56501}; Multi-pass membrane protein

Tissue Location

Only in skeletal muscle and heart (PubMed:9305858). Also expressed in white and brown adipose tissues (PubMed:9305858). Is more expressed in glycolytic than in oxidative skeletal muscles
