

**P-Glycoprotein (ABCB1) Antibody (Center)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP6111a**

**Specification**

---

**P-Glycoprotein (ABCB1) Antibody (Center) - Product Information**

Application	WB,E
Primary Accession	<a href="#">P08183</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	141479
Antigen Region	647-677

**P-Glycoprotein (ABCB1) Antibody (Center) - Additional Information**

**Gene ID** 5243

**Other Names**

Multidrug resistance protein 1, ATP-binding cassette sub-family B member 1, P-glycoprotein 1, CD243, ABCB1, MDR1, PGY1

**Target/Specificity**

This P-Glycoprotein (ABCB1) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 647-677 amino acids from the Central region of human P-Glycoprotein (ABCB1).

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

P-Glycoprotein (ABCB1) Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**P-Glycoprotein (ABCB1) Antibody (Center) - Protein Information**

**Name** ABCB1 ([HGNC:40](#))

**Synonyms** MDR1, PGY1

**Function** Translocates drugs and phospholipids across the membrane (PubMed:[2897240](#), PubMed:[35970996](#), PubMed:[8898203](#), PubMed:[9038218](#), PubMed:[35507548](#)). Catalyzes the flop of phospholipids from the cytoplasmic to the exoplasmic leaflet of the apical membrane. Participates mainly to the flop of phosphatidylcholine, phosphatidylethanolamine, beta-D-glucosylceramides and sphingomyelins (PubMed:[8898203](#)). Energy-dependent efflux pump responsible for decreased drug accumulation in multidrug-resistant cells (PubMed:[2897240](#), PubMed:[35970996](#), PubMed:[9038218](#)).

#### Cellular Location

Cell membrane; Multi-pass membrane protein {ECO:0000255|PROSITE-ProRule:PRU00441} Apical cell membrane. Cytoplasm Note=ABCB1 localization is influenced by C1orf115 expression levels (plasma membrane versus cytoplasm). Localized to the apical membrane of enterocytes (PubMed:28408210).

#### Tissue Location

Expressed in small intestine (PubMed:28408210). Expressed in liver, kidney and brain.

### P-Glycoprotein (ABCB1) Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

### P-Glycoprotein (ABCB1) Antibody (Center) - Images

ABCB1 Antibody (L661) (Cat. #AP6111a) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the ABCB1 antibody detected the ABCB1 protein (arrow).

### P-Glycoprotein (ABCB1) Antibody (Center) - Background

The membrane-associated ABCB1 protein is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD,

OABP, GCN20, White). This protein is a member of the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance. ABCB1 is an ATP-dependent drug efflux pump for xenobiotic compounds with broad substrate specificity. It is responsible for decreased drug accumulation in multidrug-resistant cells and often mediates the development of resistance to anticancer drugs. This protein also functions as a transporter in the blood-brain barrier.
