

BAI1 Polyclonal Antibody
Catalog # AP63622**Specification****BAI1 Polyclonal Antibody - Product Information**

Application	WB
Primary Accession	O14514
Reactivity	Human, Rat, Mouse
Host	Rabbit
Clonality	Polyclonal

BAI1 Polyclonal Antibody - Additional Information

Gene ID 575

Other Names

Brain-specific angiogenesis inhibitor 1

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/40000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

BAI1 Polyclonal Antibody - Protein InformationName ADGRB1 ([HGNC:943](#))**Function**

Phosphatidylserine receptor which enhances the engulfment of apoptotic cells (PubMed:[24509909](http://www.uniprot.org/citations/24509909)). Also mediates the binding and engulfment of Gram-negative bacteria (PubMed:[26838550](http://www.uniprot.org/citations/26838550)). Stimulates production of reactive oxygen species by macrophages in response to Gram-negative bacteria, resulting in enhanced microbicidal macrophage activity (PubMed:[26838550](http://www.uniprot.org/citations/26838550)). In the gastric mucosa, required for recognition and engulfment of apoptotic gastric epithelial cells (PubMed:[24509909](http://www.uniprot.org/citations/24509909)). Promotes myoblast fusion (By similarity). Activates the Rho pathway in a G-protein-dependent manner (PubMed:[23782696](http://www.uniprot.org/citations/23782696)). Inhibits MDM2-mediated ubiquitination and degradation of DLG4/PSD95, promoting DLG4 stability and regulating synaptic plasticity (By similarity). Required for the formation of dendritic spines by ensuring the correct localization of PARD3 and TIAM1 (By similarity). Potent inhibitor of angiogenesis in brain and may play a significant role as a mediator of the p53/TP53 signal in

suppression of glioblastoma (PubMed:11875720).

Cellular Location

Cell membrane; Multi-pass membrane protein. Cell projection, phagocytic cup {ECO:0000250|UniProtKB:Q3UHD1}. Cell junction, focal adhesion {ECO:0000250|UniProtKB:Q3UHD1}. Cell projection, dendritic spine {ECO:0000250|UniProtKB:C0HL12}. Postsynaptic density {ECO:0000250|UniProtKB:Q3UHD1} [Vasculostatin-40]: Secreted

Tissue Location

Expressed in brain (at protein level) (PubMed:12074842, PubMed:12507886). Expressed on mononuclear phagocytes and monocyte-derived macrophages in the gastric mucosa (at protein level) (PubMed:24509909). Expressed in normal pancreatic tissue but not in pancreatic tumor tissue (PubMed:11875720). Reduced or no expression is observed in some glioblastomas (PubMed:12507886)
