

HP-1 γ mouse Monoclonal Antibody(2F5)
Catalog # AP63827**Specification****HP-1 γ mouse Monoclonal Antibody(2F5) - Product Information**

| | |
|-------------------|------------------------|
| Application | IF |
| Primary Accession | Q13185 |
| Reactivity | Human, Mouse, Rat |
| Host | Mouse |
| Clonality | Monoclonal |

HP-1 γ mouse Monoclonal Antibody(2F5) - Additional Information**Gene ID** 11335**Other Names**

Chromobox protein homolog 3 (HECH) (Heterochromatin protein 1 homolog gamma) (HP1 gamma) (Modifier 2 protein)

Dilution

IF~~IF: 1:50-200 WB 1:500-2000,IHC-p 1:50-300

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

HP-1 γ mouse Monoclonal Antibody(2F5) - Protein Information**Name** CBX3**Function**

Seems to be involved in transcriptional silencing in heterochromatin-like complexes. Recognizes and binds histone H3 tails methylated at 'Lys-9', leading to epigenetic repression. May contribute to the association of the heterochromatin with the inner nuclear membrane through its interaction with lamin B receptor (LBR). Involved in the formation of functional kinetochore through interaction with MIS12 complex proteins. Contributes to the conversion of local chromatin to a heterochromatin-like repressive state through H3 'Lys-9' trimethylation, mediates the recruitment of the methyltransferases SUV39H1 and/or SUV39H2 by the PER complex to the E-box elements of the circadian target genes such as PER2 itself or PER1. Mediates the recruitment of NIPBL to sites of DNA damage at double-strand breaks (DSBs) (PubMed:28167679).

Cellular Location

Nucleus. Note=Associates with euchromatin and is largely excluded from constitutive heterochromatin. May be associated with microtubules and mitotic poles during mitosis (Potential).

HP-1 γ mouse Monoclonal Antibody(2F5) - Protocols

Provided below are standard protocols that you may find useful for product applications.
