

HGK Polyclonal Antibody
Catalog # AP70313**Specification****HGK Polyclonal Antibody - Product Information**

Application	WB
Primary Accession	O95819
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal

HGK Polyclonal Antibody - Additional Information**Gene ID** 9448**Other Names**

MAP4K4; HGK; KIAA0687; NIK; Mitogen-activated protein kinase kinase kinase 4; HPK/GCK-like kinase HGK; MAPK/ERK kinase kinase 4; MEK kinase kinase 4; MEKKK 4; Nck-interacting kinase

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

HGK Polyclonal Antibody - Protein Information**Name** MAP4K4 ([HGNC:6866](#))**Synonyms** HGK, KIAA0687, NIK**Function**

Serine/threonine kinase that plays a role in the response to environmental stress and cytokines such as TNF-alpha. Appears to act upstream of the JUN N-terminal pathway (PubMed:9890973). Activator of the Hippo signaling pathway which plays a pivotal role in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. MAP4Ks act in parallel to and are partially redundant with STK3/MST2 and STK4/MST2 in the phosphorylation and activation of LATS1/2, and establish MAP4Ks as components of the expanded Hippo pathway (PubMed:26437443). Phosphorylates SMAD1 on Thr- 322 (PubMed:21690388).

Cellular Location

Cytoplasm.

Tissue Location

Widely expressed. Isoform 5 is abundant in the brain. Isoform 4 is predominant in the liver, skeletal muscle and placenta.

HGK Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
