

Menin Polyclonal Antibody
Catalog # AP70915**Specification**

Menin Polyclonal Antibody - Product Information

Application	WB
Primary Accession	O00255
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal

Menin Polyclonal Antibody - Additional Information**Gene ID** 4221**Other Names**

MEN1; SCG2; Menin

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/20000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

Menin Polyclonal Antibody - Protein Information**Name** MEN1**Synonyms** SCG2**Function**

Essential component of a MLL/SET1 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3 (H3K4). Functions as a transcriptional regulator. Binds to the TERT promoter and represses telomerase expression. Plays a role in TGFB1-mediated inhibition of cell-proliferation, possibly regulating SMAD3 transcriptional activity. Represses JUND-mediated transcriptional activation on AP1 sites, as well as that mediated by NFKB subunit RELA. Positively regulates HOXC8 and HOXC6 gene expression. May be involved in normal hematopoiesis through the activation of HOXA9 expression (By similarity). May be involved in DNA repair.

Cellular Location

Nucleus. Note=Concentrated in nuclear body-like structures. Relocates to the nuclear matrix upon gamma irradiation

Tissue Location

Ubiquitous.

Menin Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
