

## **PGK1 Antibody (Center S320)**

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP7169a

# **Specification**

# PGK1 Antibody (Center S320) - Product Information

Application WB, IHC-P,E Primary Accession P00558

Other Accession Q60HD8, Q5I7W1

Reactivity
Predicted
Host
Clonality
Isotype
Antigen Region

Human
Monkey
Rabbit
Polyclonal
Rabbit IgG
A05-334

## PGK1 Antibody (Center S320) - Additional Information

#### **Gene ID 5230**

## **Other Names**

Phosphoglycerate kinase 1, Cell migration-inducing gene 10 protein, Primer recognition protein 2, PRP 2, PGK1, PGKA

# Target/Specificity

This PGK1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 305-334 amino acids from the Central region of human PGK1.

# **Dilution**

WB~~1:1000 IHC-P~~1:10~50

#### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

PGK1 Antibody (Center S320) is for research use only and not for use in diagnostic or therapeutic procedures.

# PGK1 Antibody (Center S320) - Protein Information

### Name PGK1

# **Synonyms PGKA**

**Function** Catalyzes one of the two ATP producing reactions in the glycolytic pathway via the reversible conversion of 1,3- diphosphoglycerate to 3-phosphoglycerate (PubMed:30323285, PubMed:7391028). In addition to its role as a glycolytic enzyme, it seems that PGK-1 acts as a polymerase alpha cofactor protein (primer recognition protein) (PubMed:2324090). May play a role in sperm motility (PubMed:26677959).

# Cellular Location Cytoplasm.

## **Tissue Location**

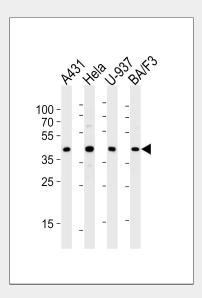

Mainly expressed in spermatogonia. Localized on the principle piece in the sperm (at protein level). Expression significantly decreased in the testis of elderly men

# PGK1 Antibody (Center S320) - Protocols

Provided below are standard protocols that you may find useful for product applications.

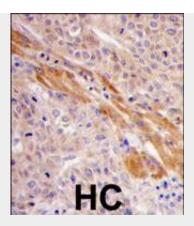

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# PGK1 Antibody (Center S320) - Images

Western blot analysis of lysates from A431, Hela, U-937, BA/F3 cell line (from left to right), using PGK1 Antibody (S320) (Cat. #AP7169a). AP7169a was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug per lane.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with PGK1 Antibody (Center S320)(Cat.#AP7169a), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

# PGK1 Antibody (Center S320) - Background

Also known as ATP:3-phosphoglycerate 1-phosphotransferase, this major enzyme in glycolysis catalyzes the reversible conversion of 1,3-diphosphoglycerate to 3-phosphoglycerate, generating one molecule of ATP. Phosphoglycerate kinase not only functions in glycolysis but is secreted by tumor cells and is proposed to participate in the angiogenic process as a disulfide reductase. Mutations in PGK1 may be associated with hemolytic anemia.
